

Thank you!

**Thank You! *Do leave a rating and review for the course.***

By spending just a few minutes every day, this course provided you a solid foundation on AWS core services using a combination of lectures, labs and quizzes.

In the Part 2 of the course, we will focus on application and value-added services: Cloud Database Products (Relational, DynamoDB, Aurora, Aurora Serverless, Redshift and more), Fargate, Elastic Container Service, Kinesis, SNS, SQS, SES, API Gateway, Lambda, Programmatic Integration with AWS, and more.

Looking forward to seeing you in Part 2 of the course.
